
(I) Absorbable, Haar
(II) Absorbable, narrow Gaussian
(III) Nonlocal, Haar
(a)
Naive test
Shape change $\Delta(\alpha)$
$f = (\pi/4, \pi/3)$
Encoding interpolation α
(b)
Hypothesis class test
Class witness $S(\alpha)$
(I), (II): $S(\alpha) = 0$ exactly
Encoding interpolation α
(c)
Prior test
Spectral-prior distance $D_\Sigma(\alpha)$
Haar null
Encoding interpolation α
(d)
Shape change $\Delta(t)$
Query path parameter t
(e)
Class witness $S(t)$
layer 2
recurrence
(I), (II): $S(t) = 0$ exactly
Query path parameter t
(f)
Spectral-prior distance $D_\Sigma(t)$
Haar null
Query path parameter t
